Investing in research, education & our future
2015 ORAL AND MAXILLOFACIAL SURGERY
FOUNDATION BOARD OF DIRECTORS

Dr. Thomas B. Dodson  CHAIR
Dr. Anthony M. Spina  VICE CHAIR
Dr. Daniel J. Daley, Jr.  IMMEDIATE PAST CHAIR
Dr. Ira D. Cheifetz  TREASURER
Mr. Dwight S. Edwards  SECRETARY (EX-OFFICIO)

Dr. J. David Allen
Dr. Kathy A. Banks
Dr. Mark A. Egbert
Dr. Eric T. Geist
Dr. Arthur C. Jee
Mr. William C. Passolt
Dr. Miro A. Pavelka
Dr. Joseph F. Piecuch
Mr. Kenneth C. Thomalla
Message From the Chair

A year ago the OMS Foundation Board of Directors reviewed the OMS Foundation and said, “Good.” Then we followed with, “But could be better.”

We were proud of what we had accomplished—millions of dollars given back to the specialty, research funding that made positive strides in patient care and specialty advancement, and a strong core of loyal supporters. We knew, however, there were avenues left to be explored, different ways to communicate, and new people to reach.

We started broadly with redefining the Foundation’s vision statement: Our goal is to transform oral and maxillofacial surgery by facilitating scientific discovery, clinical innovation, and education.

Then we moved to the heart of any organization—the mission statement. Our new mission statement, the OMS Foundation strategically invests in opportunities at the forefront of research, patient care, and education, better reflects who we are and why we are in existence.

The OMS Foundation is an organization whose focus is on investing in outcomes that benefit us all—that benefit the specialty—in perpetuity.

As a Board, we see the Foundation as an investment organization. We want you to see this as well. It is our job to elevate the specialty by being caretakers for the future. We are investing in research proposals that will enhance and transform our knowledge of materials, technology, disease and surgical techniques. We are lending a supporting hand to young oral and maxillofacial surgeons who have the talent, the temperament and the desire to become the next generation of academics—those who will teach and inspire the next generation of oral and maxillofacial surgeons.

It is also our job to communicate our mission effectively. In 2015 we introduced a new, updated logo. Our revamped website and marketing materials focus on the outcomes of Foundation-funded research and education.

Lastly, we took a look at all of the ways in which you, as oral and maxillofacial surgeons, could become involved in the Foundation. As part of our new focus, last fall we stopped collecting annual memberships to support the Foundation. We are now driven by an Annual Fund. We have multiple giving tiers, allowing you to choose a level of investment that works for you.

Through all of this exciting change, we approved $680,000 in funding in 2015 for research awards, faculty awards, and resident opportunities. Our funding has led our grant recipients to obtain multiple outside grants, publications, and abstracts, leading the way for significant progress in patient care.

Your support of the OMS Foundation has fortified—and will continue to fortify—our mission. At the beginning of 2015 we said, “Good.” At the end of 2015, we said, “Better.” Thank you for being a part of this metamorphosis. We look forward to your continued support.

THOMAS B. DODSON, DMD, MPH
Chair
Research and Education Funding

In 2015, the OMS Foundation Board of Directors approved $680,000 in funding for research and education in the OMS specialty. This total includes:

- Seven Research Support Grants ($525,000)
- Support of Faculty Educator Development Awards (FEDAs) ($130,000)
- Support of AAOMS/OMS Foundation/MICHR Clinical Trials Course ($15,000)
- Scholarships for residents to attend the AAOMS/OMS Foundation/MICHR Clinical Trials Course ($10,000)
- Stephen B. Milam Research Support Grant—$75,000
  - Role of Neurotrophin Pathway in Oral Cancer Perineural Invasion
    PI: Chi Tonglien Viet, DDS, PhD
    Co-PI: Brian L. Schmidt, DDS, MD, PhD
  - Research Support Grant—$75,000 each
    - Cell autonomous and non-cell autonomous role of Jagged1 signaling during maxillary development
      Emory University
      PI: Steven Goudy, MD
      Co-PI: Shelly Abramowicz, DMD, MPH

The team at Nova Southeastern University is researching bone regeneration.
The team at Providence Portland Medical Center is researching oral squamous cell carcinoma.

- **TMJ Disc Regeneration by Spatiotemporal Delivery of Growth Factors in 3D-Printed Scaffolds**
  Columbia University
  PI: Chang Lee, PhD
  Co-PI: Alia Koch, DDS, MD

- **Injectable Platelet Rich Plasma delivery systems for craniofacial tissue regeneration**
  University of Connecticut Health Center
  PI: Lakshmi S. Nair, PhD
  Co-PI: Regina Landesberg, DMD, PhD

- **Targeting the surgical site to drive immune-mediated clearance of minimal residual disease in oral squamous cell carcinoma**
  Providence Portland Medical Center
  PI: Richard Bryan Bell, DDS, MD
  Co-PIs: Michael J. Gough, PhD; Marka R. Critten, PhD, MD; Rom S. Leidner, MD

- **Nano fibrous scaffold loaded with human orofacial stem cell and BMP2 for bone regeneration—an in vivo study**
  Nova Southeastern University
  PI: Umadevi Kandalam, PhD
  Co-PI: Steven I. Kaltman, DMD, MD

- **In vivo evaluation of fluorapatite-coated PCL scaffold for osteoinductive capabilities**
  Regents of the University of Michigan
  PI: Sharon Aronovich, DMD, FRCD(C)
  Co-PI: Jun Liu, MS, PhD; Stephen Feinberg, DDS, MS, PhD; Wen X. Zhang, MD

*Fund in part by the OMS Foundation Alliance*
Researcher Spotlight

Kelly Kennedy, DDS, MS

Research Support Grants further the development of scientific investigators.

In 2011, Dr. Kelly Kennedy was awarded an OMS Foundation Research Support Grant for the project Bone Regeneration Directed by TCP Stem Cells and Controlled-Release Growth Factors. This project has generated one full paper, with another in preparation, three abstracts, and six presentations on the research.

DR. KENNEDY COMMENTS ON HER RESEARCH CAREER.

In layman’s terms, describe your research and its potential benefit to patients.

The idea behind the research is to deliver methods for bone regeneration that avoid the use of autogenous bone grafts. This, of course, would decrease the associated surgical morbidity. We are also exploring methods using time-released growth factors which have the potential to tailor the bone graft to the patient’s needs.

Why did you choose a career in academics versus private practice?

Through a little luck! A faculty position became available as I was finishing my chief year and I was fortunate enough to get an interview and be chosen for the job. This has been one of my best “life moments” to date. An academic practice provides all of the necessities to keep me stimulated professionally. Teaching in the classroom and operating room keeps me sharp and intellectually challenged. Additionally, working in a large medical center provides endless opportunities for collaboration in excellent patient care and multi-specialty research projects.

What other research areas do you see as vital for the future of the OMS specialty?

I think that we must look at ideas that clearly define how valuable we are to healthcare through the services that we provide. This is especially important in areas where the OMS specialty overlaps with others. For example, data on the safety and success of the operator-anesthetist model in our practices, in my opinion, will be critical to our specialty moving forward.

What would you say to encourage OMSs to apply for research awards from the OMS Foundation?

Go for it! The Foundation and supporting staff make the entire process very user friendly with timely responses and constructive feedback. From personal experience I must say that it is extremely rewarding to have your project funded and deemed valuable to the specialty by peer OMSs.
“I think that we must look at **ideas** that clearly define how **valuable** we are to healthcare through the **services** that we provide.”

**How is the OMS Foundation valuable to research and education in the OMS specialty?**

The OMS Foundation is indispensable in advancing our specialty. The way that we grow as a specialty is founded on research and education. Continually evolving in our treatment methods is what is necessary to continue providing excellent care for our patients. The OMS Foundation supports clinicians in endeavors to see that this evolution continues.

The **OMS Foundation** has funded **105 Research Support Grants**. The first one was for $25,000 in 1986, awarded to Ohio State University for the research *Production of a Full Thickness Oral Mucosal Equivalent In Vitro Suitable for Grafting Intrarally*. The Principal Investigator was Stephen Feinberg, DDS, PhD, MS.

Dr. Feinberg has received one AAOMS fellowship and two Foundation Research Support Grants, for a total of $145,000 in the areas of engineered oral mucosa and scaffolds for TMJ reconstruction. His research has received more than $21 million in funding from other sources including the NIH and Department of Defense.
Proud Sponsor of the Research and Education Conference

Scholarships provide opportunities for the next generation of surgeons.

The OMS Foundation was a proud sponsor of the 2015 AAOMS Research and Education Conference. In addition to the $10,000 sponsorship, the OMS Foundation provided funding for ten oral and maxillofacial surgery residents to attend. Brasseler USA was a generous supporter of the OMS Foundation Research and Education Conference Resident Scholarships program.

The Research and Education Conference included renowned researchers from various disciplines to discuss groundbreaking technologies and science that will affect the OMS specialty, and it highlighted careers in education and research. The OMS Foundation has sponsored the Research and Education Conference and supported resident scholarships to this event since 2007.

“The 2015 Research and Education conference in Rosemont brought together some of the greatest minds in our field to engage in lively and enthusiastic discussions about cutting-edge research and technology. As a resident, the experience to be among these leaders and participate in these conversations was truly invaluable.”

DR. SAPNA LOHIYA
SCHOLARSHIP RECIPIENT
RESEARCH AND EDUCATION
CONFERENCE RESIDENT
SCHOLARSHIP RECIPIENTS:

Dr. Imran Ahson, University of Florida, Jacksonville

Dr. Brian Christensen, LSUHSC New Orleans Department of OMFS

Dr. Steven L. Farnsworth, University of Texas Health Science Center at San Antonio

Dr. Brian E. Kinard, Emory University School of Medicine, Department of Surgery, Division of OMS

Dr. Sapna Lohiya, University of Washington

Dr. Caitlin B.L. Magraw, University of North Carolina, Department of OMFS

Dr. Melissa Moutray, University of Nebraska Medical Center

Dr. Neeraj Panchal, Parkland Hospital/University of Texas Southwestern Oral and Maxillofacial Surgery

Dr. Paul Peterson, University of Minnesota

Dr. Joseph Yang, University of California, San Francisco

“The aspect of this meeting that struck me the most was its focus on intellectual stimulation. The focused small groups really encouraged young investigators to develop creative research projects and it was encouraging to see these ideas shared with the entire conference later in the week. Not only did I learn a lot about the procedural aspects of research (i.e., applying for grants, etc.) but I learned a tremendous amount about ongoing projects that will likely change our perception of disease processes and how we do surgery in the future.”

DR. CAITLIN B.L. MAGRAW
SCHOLARSHIP RECIPIENT
Distinguished Individuals

We were honored to present recognition awards at the 2015 AAOMS Annual Meeting.

Torch Award

Dr. David E. Frost

The Torch Award is the highest award given by the OMS Foundation, recognizing individuals or organizations who have provided exemplary service to the OMS Foundation. Along with his career in private practice and teaching oral and maxillofacial surgery, Dr. Frost has tirelessly promoted the OMS Foundation’s mission to support research and education in the specialty. He is a former OMS Foundation Chairman and currently serves as an OMS Foundation State Ambassador for North Carolina.

Research Recognition Award

Dr. Timothy Turvey

The Research Recognition Award is awarded to oral and maxillofacial surgeons who have made outstanding contributions to the specialty through their research. Dr. Timothy Turvey, professor and chairman of the Department of Oral and Maxillofacial Surgery at the University of North Carolina School of Dentistry and at UNC Hospitals, is the co-founder and co-director of the UNC Dentofacial Program and a member of the Craniofacial Center. He lectures in cleft palate, surgical-orthodontics, and craniofacial surgery. Dr. Turvey’s research interests include long-term stability and adaptation to the correction of facial deformities. His work has been published in over seventy books and journal articles.
A History of Recognition

1975 The first Research Recognition Award was awarded to Dr. Philip J. Boyne.

1984 The first Torch Award was awarded to Dr. Fred A. Henny.

1995 The first Daniel M. Laskin Award was awarded to Dr. Edward Ellis III.

2001 The first Ambassador Service Award was awarded to Dr. Ryland Traynham.

Gerald E. Hanson Ambassador Service Award

Dr. W. Frederick Stephens

The Gerald E. Hanson Ambassador Service Award is given to a leader among OMS Foundation Ambassadors who has shown outstanding effort in raising support for research and education in our specialty. Not only does he serve as a leader for all Ambassadors, Dr. Stephens works directly in California to raise support for the OMS Foundation. His positive attitude and continuous effort energizes our Ambassadors and inspires support.

Daniel M. Laskin Award

The OMS Foundation Daniel M. Laskin Award is presented annually to the authors of the most outstanding article published in the Journal of Oral and Maxillofacial Surgery from the previous year. The article is selected by the Editorial Board of JOMS. The 2015 OMS Foundation Daniel M. Laskin Award was awarded to the article titled “Effect of Quality of Life Measures on the Decision to Remove Third Molars in Subjects With Mild Pericoronitis Symptoms.” The authors of this article are: Dr. Dana T. Tang, Dr. Ceib Phillips, Dr. William R. Profitt, Dr. Lorne D. Koroluk and Dr. Raymond P. White.
Six Decades and Still Going Strong

Dr. Raymond P. White is a respected researcher and long time donor.

After six decades in the specialty, Dr. Raymond P. White, Jr. still says, “I am extremely happy to be an oral and maxillofacial surgeon.” His career, which started as an interest in biological systems in the 1960s, has evolved into a distinguished tenure of leadership and clinical research.

He adds, “I am fortunate to have had a rewarding academic career.” An internationally-known research investigator and presenter, Dr. White is the Dalton L. McMichael Distinguished Professor of Oral and Maxillofacial Surgery at the University of North Carolina (UNC) School of Dentistry. He served as Dean there from 1974 to 1981.

Among many awards, he is also the recipient of the Distinguished Service Award given by the American Association of Oral and Maxillofacial Surgeons (AAOMS) and the OMS Foundation Torch Award, Research Recognition Award and Daniel M. Laskin Award.

One of the highlights of his career is his role as the Principal Investigator for the Third Molar Clinical Trials, a series of clinical studies designed to improve third molar treatment.

In 1998, the AAOMS and the OMS Foundation funded the Multicenter Trial of Third Molar Patient Management with an initial pledge of $2 million over five years. Funding from the OMS Foundation continued until 2012. Total support for the Third Molar Study from the OMS Foundation was $1.4 million.

The Third Molar Clinical Trials was the umbrella project aimed at generating data on management of patients with asymptomatic third molars. Results from this study have significantly impacted the oral and maxillofacial surgery specialty. The studies produced strong evidence that even asymptomatic unerupted and partly erupted third molar teeth may have significant bacterial colonization with periodontal pathogens and associated periodontal pathology.

The study has generated more than 130 peer reviewed abstracts and papers. In addition, at least three OMS residents have won Straumann awards for their papers based on data from the Third Molar Clinical Trials.

Dr. White says it is difficult for clinical faculty to get National Institutes of Health (NIH) funding.
OMS Foundation funding for research, therefore, is critical to advancing the specialty. “The OMS Foundation is a major funding source for the specialty,” says Dr. White.

Early on he was inspired by specialty leaders Drs. Phillip Fleuchaus, Gerald Laboda, Markell Kohn, and James Kelly to donate to the OMS Foundation.

“Their vision had a huge role in moving the Foundation forward,” Dr. White says. He was also inspired by the vision of Dr. James A. Davis, Jr. to dramatically increase the OMS Foundation’s financial base to enable research funding for multiple years.

He has been a donor to the OMS Foundation since 1990. In addition to annual gifts, Dr. White is a member of the Robert V. Walker Society.

“I appreciate what the OMS Foundation has done,” he says. “It’s important to our future as a specialty.”

“The Third Molar Clinical Trials have generated more than 130 peer reviewed abstracts and papers.”
# OMS Foundation-Funded Research May Lead to Novel Treatment Modalities

## 2014 Stephen B. Milam Research Support Grant: Research Underway in 2015

The 2014 Stephen B. Milam Research Support Grant was awarded to the research team at the University of Pennsylvania School of Dental Medicine. Principal Investigator Qilin Xu, MD, PhD and Co-PI Lee Carrasco, DDS, MD, PhD collaborated on the project titled *Overexpression of Notch3 by MSCs in the Pathogenesis of Jaw Bone Giant Cell Tumors*. Giant cell tumor of bone (GCT) comprises approximately 6% of all primary bone tumors. The objective of this proposal is to investigate whether stromal cells/mesenchymal stem cells (MSCs) derived from GCTs are capable of developing GCT and the potential mechanisms.

The central hypothesis of this study to be tested is that Notch3-governed sustained autocrine secretion of M-CSF/IL-34 and the positive feedback loop in GCT-MSCs play a key role in jaw bone GCT formation and interruption of this feedback loop may lead to the development of novel adjuvant or primary treatment modalities for patients with GCT.

The Stephen B. Milam Research Support Grant is awarded annually by the OMS Foundation Committee on Research to the research proposal receiving the highest score.

Robert V. Walker Society

Legacy through planned giving

Established in 1997, the Robert V. Walker Planned Giving Society was implemented to secure the OMS Foundation’s future. Named in honor of Dr. Robert V. Walker, a luminary in the specialty, the Society currently recognizes individuals who make planned and estate gifts of $25,000 or more. Dr. Walker was a former OMS Foundation Chairman and long-time advocate of the Foundation’s mission.

Members
Robert V. Walker Society members have provided documentation for their planned gifts.

Platinum
($1,000,000 OR MORE)
- Dr. Bernard C. Pecaro

Gold

“Life’s most persistent and urgent question is, ‘What are you doing for others?’”

MARTIN LUTHER KING, JR.
The OMS Foundation Alliance

Dedicated to the OMS Foundation’s mission.

For more than 20 years, the Alliance has been dedicated to supporting the Oral and Maxillofacial Surgery Foundation.

The Alliance’s numerous activities at the AAOMS Annual Meeting each year provide a variety of networking opportunities for spouses, allied staff, and friends of oral and maxillofacial surgeons to get involved in the specialty. Annual Meeting activities sponsored by the Alliance include daily health walks, breakfasts, and the much-anticipated Alliance Annual Event, which raises funds to support the OMS Foundation.

Since 1993, the Alliance has contributed more than $190,000 to the Foundation for groundbreaking Research Support Grants, Student Training Grants, and Clinical Surgery Fellowships. In addition, the Alliance provides Resident Spouse Scholarships that ease the cost of travel to the AAOMS Annual Meeting.
The Alliance is honored and pleased to recognize the following 2015 Corporate Partners:

**Canfield, Inc.**
Alliance Health Walks T-shirt Sponsor

**Jaw Bra**
Alliance Breakasts Sponsor

**KLS-Martin**
Annual Event Sponsor

**BioHorizons**
Annual Event Sponsor

**OMSNIC**
Alliance Resident Spouse Scholarships Sponsor

---

**2015 Alliance Board**

Ms. Adaline Klemmedson, *Chair*, Tucson, AZ

Ms. Kelly Hudson, *Vice Chair*, Knoxville, TN

Ms. Cindy Stigall, *Immediate Past Chair*, Boone, NC

Ms. Carmen Hupp, Gainesville, FL

Ms. Michelle Schneider, Maple Grove, MN

Ms. Christina Seldomridge, Leola, PA

---

“It was **refreshing** to attend the Alliance events and experience the transparency in other women as they discussed their residency and now employment **experiences**. To be part of a group that has gone through a similar season of life provides a sense of **camaraderie** that is **inspiring**.”

KRISTEN REDDINGER, 2015 ALLIANCE RESIDENT SPOUSE SCHOLARSHIP RECIPIENT
Annual Donors

In 2015, the OMS Foundation transitioned its annual giving program to expand recognition for our donors. The Research and Education Advance Patient care (REAP) program was phased out and replaced with the Annual Fund on September 1, 2015. The following list provides recognition for cumulative annual giving during 2015 using the new Annual Fund gift recognition levels. Individuals who made a REAP Society level contribution in 2015 ($1,500 or more between January 2015 and August 31, 2015) are listed with an asterisk beside their name.

Leader
($5,000–9,999)
Dr. Brett L. Ferguson

Major Donors

Major donors are individuals who have made multi-year pledges or cash gifts of $25,000 or more. Their commitment to the OMS Foundation allows us to help shape the future of our specialty. A list of prior and current year Major donors can be found at http://omsfoundation.org/our-donors/individual-donors/.
